In the event of any conflict between the English and German text, its structure, meaning or interpretation, the German text, its structure, meaning or interpretation prevails.

I. General Provisions

Section 1 – Purpose of the Program of Study

¹The master's examination marks the proper completion of the master's program "Business Informatics" (M.Sc.) at the School of Business Informatics and Mathematics and the Business School (master's program "Business Informatics").

²The completion of the master's examination constitutes the second professional qualification (consecutive degree). ³The master's examination serves to prove whether a student has gained substantial knowledge in the field of business informatics. ⁴In addition, it serves to demonstrate whether the student has the ability to apply scientific methods and findings adequately in order to ensure a successful transition into research or the labor market.

Section 2 – Graduation

¹Based on the completion of the master's examination, the School of Business Informatics and Mathematics of the University of Mannheim awards the academic degree "Master of Science" (M.Sc.). ²In accordance with section 34, the academic degree is only to be used after having received the diploma.

Section 3 – Required Coursework and Examinations, Structure, and Language of Instruction and Examination

(1) ¹Coursework and examinations within the master's program total at least 120 ECTS and are obtained in line with the structure of each subject area:

1. Fundamentals Computer Science (18 ECTS credits),
2. Fundamentals Business Administration (at least 18 ECTS credits)
3. Specialization Courses (36 ECTS credits),
4. Projects and Seminars (18 ECTS credits) and
5. Master's Thesis (30 ECTS credits).

²The detailed rules and regulations on the required ECTS credits for each subject area are specified in sections 25 to 30 in conjunction with the annex. ³One ECTS credit corresponds to a workload of 30 hours.

(2) ¹The master's program has a modular structure. ²A course usually includes technical, topical and coherent units of instruction (modules); exceptions are the module Seminar in the area Projects and Seminars. The modules Team Project and Master's Thesis do not include a course. ³The individual modules are organized by superordinate units (subject areas). ⁴The composition of the areas is specified in the annex of these Examination Regulations; course contents are stated in the current version of the University of Mannheim's module catalog for the master's program "Business Informatics" (M.Sc.); the joint committee on student affairs and teaching of the School of Business Informatics and Mathematics and the Business School approves the module catalog. ⁵If the Examination Regulations or the module catalog refer to other examination regulations or module catalogs, the rules and regulations of said examination regulations and module catalogs apply in line with the rules and regulations of these Examination Regulations.

(3) ¹As a rule, the majority of the courses are taught in English; courses may also be taught in German. ²The language of instruction of a module is stated in the current version of the module catalog. ³In case there is a choice between the languages, the examiner responsible will decide in which language the module will be held during that particular semester. ⁴The decision according to sentence 3 is announced by the examiner using appropriate means in due time before the examination, usually at the beginning of the lecture period for the respective semester. The examiner is also to communicate this decision to Student Services. ⁵If a module is designated as an English-taught module by the module catalog or the examiner, the course which belongs to it is held completely in English. All of the coursework and examinations (required preliminary coursework and examinations) for this course are to be completed in English. ⁶Regarding the language of the master's thesis, the regulations of sentences 1 to 5 apply with the condition that the examiner and the student decide on the language at the time the topic for the master's thesis is given to the student at the latest.

Section 4 – Standard Period of Study, Maximum Period of Study

(1) The period of study for the master's program, during which all coursework and examinations required to pass the master's examination are to be completed, is four semesters (standard period of study).

(2) ¹All coursework and examinations that must be completed as a part of the master's examination must be completed within a given time (maximum period of study). ²The maximum period of study ends three semesters after the standard period of study at the end of the seventh semester, unless the student is not responsible for having exceeded this time. ³The student will be notified by the examination committee if they have exceeded the deadline; eligibility to take exams is lost in accordance with section 32 subsection 5(3) alternative 2 LHG.

(3) ¹At the beginning of their studies, students are recommended to seek academic advice for orientation purposes. ²This serves to help them to draw up their individual degree plans. ³If a candidate does not pass the master's examination until the end of his or her sixth semester of the program, the candidate is recommended to seek academic advice. ⁴The examination committee is in charge of the academic advising. ⁵It may pass on the task to qualified staff members.

(4) The student is responsible for meeting the deadlines listed in these Examination Regulations.

II. Organization and Administration of Examinations, Recognition of Coursework and Examinations

Section 5 – Examination Committee

(1) ¹An examination committee is formed for the "Business Informatics" (M.Sc.) program of the University of Mannheim. ²It is composed of three university teachers or senior academic staff members (Privatdozenten) of the School of Business Informatics and Mathematics or of the Area Information Systems at the Business School, who are eligible to vote, and a student member exercising an advisory function. ³The members of the examination committee are appointed by the school council of the School of Business Informatics and Mathematics.

(2) ¹The term of office of members who are eligible to vote is three years. The student member's term of office is one year. ²All members can be reappointed. ³The committee members' term of office starts on 1 August of each year. ⁴If a member of the examination committee retires from their position before the end of the term of office, a successor is appointed for the remaining term of office.

(3) ¹The school council of the School of Business Informatics and Mathematics elects a member of the examination committee to be the chair and another member to be vice chair for the duration of their term of office. The chair manages the examination committee.

(4) ¹The examination committee has a quorum if the chair or the deputy chair and at least another member are present. ²Decisions require a simple majority of votes of the present members. ³In the event of a tie, the vote of the chair decides the matter.

(5) ¹The members of the examination committee are obliged to exercise discretion. ²If they are not employed in the public service, they must be obliged to exercise discretion by the chair of the examination committee in writing. ³This obligation applies to all examination-related facts and matters

1. that the members were informed about in a non-public meeting and/or that happened to be discussed,
2. that are to be kept secret by law,
3. that were ordered or decided to be kept secret for the public good or in order to protect the legitimate interests of an individual,
4. that are to be kept secret by their nature.

⁴The obligation to exercise discretion continues after the term of office and includes discussion-related documents.

Section 6 – Competences of the Examination Committee

(1) ¹The examination committee makes all decisions regarding these Examination Regulations if no other entity is responsible. ²The examination committee enforces the examination regulations. ³It regularly reports on the developments of the study and examination periods as well as on the development of the exam results. ⁴The report must be published in an appropriate manner by the university. ⁵By way of a resolution, the committee can entrust the chair with certain tasks that the committee is normally in charge of:

1. Appointment of examiners and observers,
2. Decisions on the recognition of coursework and examinations,
3. Decisions on the approval of reasons for de-registration or absence,
4. Decisions on disadvantage compensations,
5. Decisions on the extension of deadlines,
6. Decisions on breaches of procedure,
7. Declaring the failure of the final examination attempt,
8. Declaring the exceeding of an examination deadline,
9. Assigning students to a Team Project,
10. Informing the Student Services of the topic, the duration of the preparation period and the group members of the Team Project;
11. Assigning students to a course in the module Scientific Research.

⁶The resolution can be revoked at any time.

(2) In order to support the examination committee, an office can be established whose staff is mainly in charge of proceedings on behalf of the chair or their deputy.

Section 7 – Examiners and Observers

(1) ¹Only university teachers, auxiliary professors (außerplanmäßige Professoren), honorary professors and senior academic staff members (Privatdozenten) as well as those academic members of staff who have been appointed by the President's Office in accordance with section 52 subsection 1 sentences 5 and 6 LHG, are authorized to administer coursework and examinations. ²An individual can only act as an observer if they have at least completed a master's degree or an equivalent degree at a higher education institution successfully or are certified by the state in the field of the examination.

(2) ¹Usually, the responsible teacher of each course is appointed as examiner. Section 15 subsection 4(1) as well as section 16 subsection 2(2, 5) remain unaffected. ²The examination committee can decide on exceptions.

(3) Every examiner may make use of one or several assistants for the correction of examinations; the examiner ensures competent evaluation.

(4) Examiners, observers, and assistants for the correction of examinations are obliged to exercise discretion in accordance with section 5 subsection 5.

Section 8 – Competences of the Student Services

(1) The Student Services are in charge of the administration of the examinations.

(2) In particular, the Student Services

1. determine and announce registration deadlines, examination dates and rooms,
2. announce the names of the examiners and notify them about the examination,
3. receive applications for admission and registrations for (resit) examinations from students, unless, according to these Examination Regulations, students register with the examiner.
4. enter the admissions and rejections for examinations into the system,
5. carry out compulsory registration,
6. maintain student examination records,
7. enforce the deadlines specified in these Examination Regulations,
8. are in charge of technical administration of all examinations and coordination of supervision for written examinations,
9. inform students about their examination results,
10. issue and hand out official documents, degree certificates and confirmations on coursework and examinations along with attachments.

Section 9 – Recognition of Coursework and Examinations

(1) Coursework and examinations as well as periods of study obtained in degree courses at official or officially recognized higher education institutions in Germany or abroad as well as at public universities of cooperative education ("Berufsakademien") of the Federal Republic of Germany are recognized, provided there is no significant difference between the competences obtained and the coursework or examinations.

(2) ¹For the recognition of coursework, examinations and semesters completed abroad, agreements between the Federal Republic of Germany and other countries need to be taken into account, such as agreements on equivalencies in higher education (equivalency agreements) and agreements within the framework of university partnerships and double degree programs (cooperation agreements). ²Furthermore, in cases of doubt regarding the equivalency of qualifications, the Central Office for Foreign Education (Zentralstelle für ausländisches Bildungswesen - ZAB) can be consulted.

(3) ¹Skills and qualifications obtained outside of the higher education sector are to be recognized if

1. the requirements for admission to a higher education institution are fulfilled at the time of recognition,
2. the skills and qualifications to be recognized are equivalent to the coursework and examinations to be substituted in terms of content and level, and
3. the criteria for recognition were examined as part of an accreditation.

²For recognition, the applicants have to prove that the competences they acquired outside of the higher education sector are comparable to the coursework and examinations to be substituted in terms of content and level. ³For the decision on the recognition, the form of instruction is to be considered as well. ⁴Skills and qualifications obtained outside of the higher education sector may substitute 50 percent of the master's program at most. ⁵The regulations for the recognition of coursework and examinations at public universities of cooperative education (Berufsakademien) in Germany remain unaffected.

(4) ¹The examination committee decides on the recognition upon written request. ²It is the student's responsibility to provide the examination committee with the necessary documents for the recognition of coursework and examinations.

(5) ¹If coursework and examinations are recognized and the grading systems are similar, the grades must be transferred according to these Examination Regulations and considered for calculation of the final grade. ²In order to guarantee a consistent procedure, the examination committee can pass general regulations for the conversion of grades obtained abroad within the limits of the legal provisions. ³If conversion is impossible because the grading systems differ or the coursework was not graded, the work is simply marked "passed" ("bestanden"). ⁴In this case, the coursework or examination will not be included in the final grade. ⁵The recognition is indicated in the degree certificate and in the Transcript of Records.

(6) In case the student takes part in an examination at the University of Mannheim even though they already obtained the respective qualification elsewhere, they automatically waive the right to have the previous qualification recognized.

III. Examination Process

Part 1: Coursework and Examinations

Section 10 – General Provisions; Examinations and Admission Requirements

(1) The examinations that are to be completed as a part of the master's examination, excluding the examinations Team Project and Master's Thesis, are assigned to the individual courses within the modules.

(2) ¹An examination as defined in these Examination Regulations usually involves completing one or several individual tasks. ²Group examinations are permitted unless they are incompatible with the actual form of the examination. ³The final topic of a group examination and the assignment of respective tasks to the students is to be determined by the examiner. ⁴In case of group examinations, the individual contribution of each student to the examination must be evaluated; it must be ensured that within the joint preparation of a topic the individual contribution of each group member can clearly be separated and evaluated individually.

(3) ¹The examinations of the mandatory and mandatory elective modules (mandatory and mandatory elective examinations) are specified in the Examination Regulations. ²If there are alternative examinations listed in the Examination Regulations, the responsible examiner decides on the type of examination for the respective semester. ³The decision according to sentence 2 is announced by the examiner using appropriate means in due time before the examination, usually at the beginning of the lecture period for the respective semester. The examiner is also to communicate this decision to Student Services.

(4) ¹The composition, type, form, scope and duration of the examinations belonging to the elective modules (elective examinations) are specified in the examination regulations in conjunction with the module catalog.

²If there are alternative examinations listed in the module catalog, the responsible examiner decides on the type of examination for the respective semester. ³The decision according to sentence 2 is announced by the examiner using appropriate means in due time before the examination, usually at the beginning of the lecture period for the respective semester. The examiner is also to communicate this decision to Student Services.

(5) The module catalog may include requirements to be fulfilled (required preliminary coursework) as well as further requirements in order to be admitted to an examination held by the School of Business Informatics and Mathematics. ²If, in the Examination Regulations, reference is made to the examination regulations or the module catalog of a program at a different school at the University of Mannheim, requirements to be fulfilled in order to be admitted to this examination are determined in the respective examination regulations and the module catalog of the respective program.

(6) ¹Written examinations serve to prove the student's ability to solve a problem by independently applying the common methods of the field in a limited period of time and with a limited amount of authorized materials. ²The examiner determines the authorized materials and informs the students about it using appropriate means in due time before the examination.

Section 11 – Registration and Admission to Examinations; Examination Dates

(1) ¹Students need to register for all examinations. ²It is the students' responsibility to register for an examination. ³If a student fails an examination in the first attempt or this attempt or the resit examination are deemed not taken, they will automatically be registered for the following regular examination date or have to register on their own responsibility, depending on the composition of the examination. ⁴Students are not automatically registered for exams taking place in the next semester.

(2) ¹The student is only admitted to an examination if they

1. is enrolled in the master's program "Business Informatics",
2. meet the requirements for the examination in question, having successfully completed any preliminary coursework, and
3. has not lost the eligibility to take exams in the very same program or in a program in a similar field of study, in accordance with the Selection Statutes for the Master's Program "Business Informatics" in the respective valid version.

²Additionally, the regulations stated in section 15 subsection 6(2) and subsection 7(4, 5) apply for admission to the Team Project and the regulations stated in section 16 subsection 3(2, 5) apply for admission to the master's thesis. In the area Projects and Seminars, the regulations stated in section 29 subsection 2(7) apply for admission to the examination in the module Seminar and the regulations stated in subsection 5(2) apply for admission to the examination in the module Scientific Research.

(3) ¹Excluding the Team Project, the master's thesis and the examination in the area Projects and Seminars, students need to register at the Student Services within the registration periods set by the Student Services before the examination. ²Extension of the registration period is possible through Student Services (late registration).

(3a) ¹After the registration period, a registration can only be withdrawn during the withdrawal period determined by Student Services (withdrawal). ²Once the withdrawal period has ended, the registration for an examination attempt is binding. ³Sentences 1 and 2 also apply to examinations for which students were automatically registered; they do not apply for registrations for the Team Project, the Master's Thesis and for the module Seminar in the area Projects and Seminars. ⁴If an examination is comprised of several components of coursework or examinations, the registration cannot be withdrawn if the student has already accepted a task of the first coursework or examination component from the examiner (participation).

(4) ¹If the time of the examination lies before the beginning of the registration period and the student is therefore unable to register at the Student Services before the examination, the student is considered registered as soon as he accepts the task of the examination (participation) from the examiner. ²In this case, students are admitted to the respective examination by the examiner as soon as they are given the task; it is the students' responsibility to provide the examiner with the information that is required for their admission.

(5) ¹For registration for the Team Project only the regulations of section 15 subsection 6 (1) and subsection 7 (4) apply, for registration for the master's thesis only the regulations of section 16 subsection 3 (1-3) apply and for registration for the examination in the area Projects and Seminars the regulations of section 29 subsection 2 (4-6) apply, regardless of the specific composition of the examination in the respective semester. ²In the module Scientific Research in the area Projects and Seminars, students register for each attempt at the examination by registering for the corresponding course with the examination committee. Once the student has been assigned to a course, the registration for the corresponding examination is binding and the student is admitted to the examination.

(6) If an examination involves completing a task, the following requirements apply to the registration by the student:

1. In the case of a supervised, written examination:
 - a. ¹The regular examination dates for supervised, written examinations are to be scheduled at the start of the semester break. The alternate examination dates are to take place before the following lecture period begins, or at the latest during the first week. ²There must be at least three weeks time between announcing the results from the regular examination date and the alternate examination date. ³The alternate examination date counts for the semester in which the regular date took place. ⁴Examination dates for the examination in the module Scientific Research in the area Projects and Seminars may differ from this regulation.
 - b. In the area Fundamentals Computer Science, students can register for either the regular or the alternate exam date, excluding the examination in the module Systems Software (IS 553).
 - c. ¹Students can only register for the regular examination date in the module Systems Software (IS 553) in the area Fundamentals Computer Science, as well as in the areas Fundamentals Business Administration, Specialization Courses and Projects and Seminars. ²If an examination is divided into two parts for the regular examination date, the first part is to be taken during the course while the second part is to be taken on the date of the regular examination date as defined in letter a sentence 1. For the alternate examination date both parts are to be taken together.
 - d. ¹If an attempt was failed or deemed not taken at the regular examination date, students are automatically registered for the second (alternate) examination date of the respective semester, provided they are eligible for a further examination attempts. ²However, the student will not be automatically registered for the examination in the module Scientific Research in the area Projects and Seminars; the student is responsible to register again for the next possible examination date.
2. In the case of an oral examination or similar form of examination:
 - a. ¹The regular examination dates for oral examinations and similar forms of examinations are to be scheduled at the start of the semester break. The alternate examination dates are to take place before the following lecture period begins or at the latest during the first weeks. ²There must be at least three weeks time between announcing the results from the regular examination date and the alternate examination date. ³The alternate examination date counts for the semester in which the regular date took place.
 - b. Students can only register for the regular examination date.
 - c. If an examination attempt was failed or deemed not taken, students are responsible to register themselves for another examination date, provided they are eligible for further examination attempts.
3. In the case of a term paper or similar form of examination:
 - a. ¹Students can register for the regular examination date only. ²The registration is to be completed with the examiner, subsection 3 does not apply, subsection 4 applies accordingly.
 - b. The topic of a term paper is to be handed out at the start of the semester break at the latest.

- c. If an examination attempt was failed or deemed not taken, the student is to register for the next examination date of the following semester.

(7)¹If an examination is made up of several pieces of coursework, the registration according to subsections 3 and 4 is to be completed before the first part of the examination. ²Additionally, students need to bear in mind:

1. ¹If the examination comprises partial examinations conducted during the course and a written exam, the written exam is to be taken on the regular examination date according to section 6 number 1 letter a sentence 1, all other partial examinations are to be completed before during the course. ²Students can only register for the regular examination date. ³If the examination at this examination date is failed or deemed not taken and the student is eligible for a further examination attempt, they are responsible to register themselves for another examination that is offered as part of the respective course. In derogation from sentence 3, in case examinations are given by the Business School, students are automatically registered for the alternate examination date of the same semester as part of a mandatory registration. ⁵If the latter is the case, the next possible examination date is within the same semester.
2. ¹If an examination only comprises of components that must be completed during the semester, these must be completed during the semester (examination date of a semester). ²Students can only register for the examination date of a semester. ³If a student fails a first attempt at an examination or the attempt has been deemed not taken and the student has another attempt, they need to retake the examination at the next possible occasion during the course. ⁴The student is to register for this next examination date, unless the examination is held by the Business School. ⁵If the latter is the case and the student has another attempt, they are registered automatically.

Section 12 – Type and Form of Coursework and Examinations

(1) Examinations and coursework are:

1. Examinations as defined in these Examination Regulations are individual tasks that are graded by the examiner with a grade in line with section 17 subsection 2.
2. Coursework as defined in these Examination Regulations is an individual task that is graded by the examiner as either “passed” or “failed”.

(2) ¹The types and forms of coursework and examinations are usually:

1. written tasks in the form of written examinations, term papers, project reports, master’s thesis;
2. oral tasks in the form of presentations, participation and oral examinations;
3. electronic tasks in form of programming exams or programming projects.

²Compulsory attendance may also be defined as coursework if the nature of the respective course requires a certain level of participation and communication for which a minimum number of participants need to be present.

Section 13 – Oral Examinations

(1) Oral examinations are to last at least 15 and no more than 45 minutes.

(2) ¹Oral examinations are conducted by an examiner as an individual assessment in the presence of an observer. ²Observers have an advisory role in the oral examination.

(3) ¹For oral examinations, the responsible examiner is to bring in an individual familiar with the field of study as secretary to take the minutes. ²The secretary can act as an observer at the same time.

(4) ¹Minutes from the examination (Ergebnisprotokoll) are to be taken during the main course of the oral examination. ²The result from this examination, which is to be communicated to the student shortly after its completion, is to be recorded in the minutes. ³The minutes are to be signed by the examiner, the secretary and the observer, and to be put on file.

Section 14 – Written Examinations

(1) Written examinations must last at least 20 and no more than 180 minutes.

(2) ¹As a rule, written examinations must not be conducted in the form of multiple-choice examinations. ²In justified cases, written examinations may be conducted completely or in part as multiple-choice examinations. ³In case an examination is conducted as multiple-choice throughout, the tasks must allow for reliable examination results. ⁴When designing the examination, the examiner must determine which answers are accepted as correct and how the scoring system works. ⁵If, during the assessment of the examination, it turns out that single exercises do not lead to reliable results, they must not be considered for the calculation of the examination's result. ⁶The minimum passing score is to be adjusted accordingly; lowering the passing score must not have negative implications for the students. ⁷The examination is passed if a student achieves at least the minimum passing score determined before the exam. If a student does not achieve the minimum passing score, they might still pass the exam provided their performance was good enough to be among the set minimum rate of students that will pass the exam regardless of the results (pass rate; pass rate + failure rate = 100%). ⁸If the examination is only partly multiple-choice, the regulations of this section apply to that part respectively.

(3) Each written examination is to be recorded in the minutes by the examination supervisor. The minutes have to be signed and filed unless the type of examination is not suitable for minutes.

(4) ¹When evaluating term papers or similar pieces of work for academic performance, the examiner is to ascertain the quality of research. ²Section 16 subsection 7 applies accordingly.

(5) ¹When grading term papers or an equivalent, the examination committee and the examiners are authorized to use software to detect plagiarism. ²For the grading of their work, students must submit a digital data file and a hard copy of their work to the examiners. ³In accordance with section 3 subsection 6 of the Data Protection Act of the Land of Baden-Württemberg, the work must be anonymized before using the plagiarism software. ⁴When submitting coursework as defined in sentence 1, the student must submit the following signed declaration:

“⁵I hereby declare that the paper presented is my own work and that I have not called upon the help of a third party. ⁶In addition, I declare that neither I nor anybody else has submitted this paper or parts of it to obtain credits elsewhere before. ⁷I have clearly marked and acknowledged all quotations or references that have been taken from the works of others. ⁸All secondary literature and other sources are marked and listed in the bibliography. ⁹The same applies to all charts, diagrams and illustrations as well as to all Internet resources. ¹⁰Moreover, I consent to my paper being electronically stored and sent anonymously in order to be checked for plagiarism. ¹¹I am aware that if this declaration is not made, the paper may not be graded.”

Section 15 – Examination in the Module Team Project

(1) ¹The Team Project is a mandatory module in the area Projects and Seminars with an examination of the same title. ²By passing the examination in the module Team Project, the student must prove their ability to contribute to a significant major research project as a member of a group. ³This contribution includes a written work on the research question or development task as well as a presentation of (preliminary) findings.

(2) ¹The examination Team Project consists of a written examination in form of written work and an oral examination in form of a presentation based on the first part of the examination. ²The date of the examination will be set by the examiner in consultation with the group. ³The paper as well as the presentation are group work. The group size must not exceed twelve members. ⁴The individual contribution of each member of a Team Project to the examination must be evaluated; it must be ensured that within the joint assignment of a topic the individual contribution of each group member can clearly be separated and evaluated individually.

(3) ¹The Team Projects available each semester are defined by the examiners offering the Team Project and announced using appropriate means in due time before the examination, usually at the beginning of the lecture period of the respective semester. ²The examiner is to determine the topic, the minimum and maximum number of participants as well as the duration of the Team Project. ³It is the examiner's responsibility to make sure the topic and scope of the Team Project allow for the Team Project to be completed within the set period of time.

(4) ¹The university teacher who assigned the topic of the Team Project to the participants will be the examiner. ²The examiner may assign further persons as supervisors. ³The supervisor advises students on any questions to do with the production of the written work, the individual performance and the student's self-reliance for the examination must be maintained.

(5) ¹The duration of a Team Project is one or two subject-specific semesters. ²The workload per semester depends on the length of the preparation period in total; the total workload, regardless of the length of the preparation period, is the same. ³The preparation period for the examination begins 1 February or 1 August of a year and ends, depending on the duration of the Team Project, the following 31 January or 31 July. ⁴Two hard copies and one digital copy of the written work have to be submitted and the presentation has to have been held no later than by the end of the preparation period. ⁵If one of the tasks of the examination is not completed in due time, it will be graded “failed” (5.0, “nicht bestanden”) for the respective student.

(6) ¹The student is responsible for registering with the examination committee in due time for each attempt at the examination Team Project. This also applies if an attempt has been deemed not taken. ²Once the student has been assigned to a Team Project by the chair of the examination committee, the student is admitted to the examination. ³Students are to be granted the chance to put forward suggestions for assignments. ⁴However, no legal right arises to be assigned to the suggested Team Project.

(7) ¹The topic of the Team Project may be returned once per student during the master’s program. ²For Team Projects with a duration of one semester, the topic must be returned within the first three weeks, for Team Projects with a duration of two semesters it must be returned within the first six weeks after assignment. ³If the topic is returned in time, the attempt is deemed not taken. ⁴In these cases, the student may begin a new attempt within the same semester (swap) if they register for the new Team Project within the return period, the minimum number of participants but not the maximum number of participants for the new Team Project has been reached by the time of registration and there are no academic reasons to decline admission to the new Team Project, especially the work progress of the current group. ⁵If multiple students register for the same new Team Project in due time, their registrations are considered in chronological order by the date of receipt. ⁶If a student is admitted to a new Team Project in the same semester, the same duration of the preparation period applies to the student as applies to the group members assigned to the Team Project according to subsection 6; the preparation period cannot be extended due to a swap.

(8) The tasks to be completed by individual students for the paper of the Team Project must be assigned in agreement with the examiner.

(9) ¹If the attempt for the examination Team Project is deemed not taken for one or more members of a group, the examiner is to ensure that the remaining group members are still able to continue their examination. ²In particular, the scope of the project may be adapted to the smaller group size. ³Sentences 1 and 2 also apply if the minimum group size requirement is no longer fulfilled as a consequence.

If the examinations are completed successfully, the examiner grades each examination for each group member with a grade according to section 17 subsection 2. ²When evaluating the written academic performance, the examiner is to ascertain the quality of the research. ³If data and implementations are required, they must be provided to the examiner in a suitable form when submitting the written work; the examiner informs the student of the requirement no later than at the time the topic is allocated. ⁴The group members are responsible for providing the required information outlined in sentence 2.

(11) ¹The examiner determines the grade for each participant after the end of the preparation period. ²This must be done based on the individual grades of the written work and the presentation. ³The examiner announces the weighting of the individual examination components for the calculation of the examination grade with the decisions of subsection 3.

(12) The examination committee informs the Student Services of the topic and the duration of the preparation period of the Team Project as well as the group members remaining after the end of the return period as defined in section 7 subsection 2.

Section 16 – Examination in the Module Master’s Thesis

(1) ¹By writing the master’s thesis, the student is to prove that they have acquired the skills and proficiency to work independently on a problem of their field of study employing the scientific methods available within a limited period of time. ²Group work is not permitted.

(2) ¹The master’s thesis will be evaluated by two examiners. ²The university teacher who assigns the topic of the master's thesis to the student is the main examiner. ³The first examiner must simultaneously be the supervisor. ⁴The main examiner may assign further persons as supervisors. ⁵The second examiner is appointed by

the examination committee based on the recommendation of the supervisor. ⁶The supervisor advises the student on any questions to do with the production of the master's thesis; the individual performance and the students' self-reliance for the thesis must be maintained.

(3) ¹The student is responsible for registering each attempt of the master's thesis with the main examiner in due time; this also applies if an attempt has been deemed not taken. ²Once the topic has been issued, registration is binding and the student is admitted to write their thesis. ³Late registration or de-registration after being admitted is not possible. ³As a requirement for admission to the master's thesis, the student must obtain at least 60 ECTS credits. ⁴The student is responsible for providing the main examiner with the information required for admission; in particular, a Transcript of Records is to be submitted. ⁵The main examiner ensures that this requirement has been fulfilled before allocating the topic to the student.

(4) ¹The main examiner determines and allocates the topic to the student. ²The student is to be granted the chance to put forward suggestions for a topic. ³However, no legal right arises to be assigned the suggested topic. ⁴The topic for the master's thesis must be set by the main examiner in a way that allows it to be completed within the preparation period.

(5) ¹As a rule, the time to complete the master's thesis is six months. ²The preparation period begins once the topic of the master's thesis has been allocated to the student. ³In case of valid reasons and upon written request from a student, which is submitted in due time, the examination committee is to grant individual extensions based on case by case decisions. An extension due to professional reasons is only to be granted with the consent of the examiner. ⁴A request in accordance with sentence 3 is to be made to the examination committee immediately once the student is aware of the circumstances justifying an extension and is only possible within the preparation period. ⁵Should the request not be made in due time within the meaning of sentence 4, the circumstances justifying an extension are considered irrelevant for the examination attempt concerned. ⁶Sections 23 and 24 remain unaffected.

(6) ¹The master's thesis must be submitted in due time to the main examiner in duplicate as a hard copy and as a digital data file. ²The student must submit a declaration according to section 14 subsection 5 when submitting their master's thesis.

(7) ¹When evaluating the master's thesis for academic performance, the examiners are to ascertain the quality of research. ²If data and implementations are to be submitted, the student must provide them to the examiners in adequate form when submitting the master's thesis; the main examiner informs the student of the requirement no later than at the time the topic is allocated. ³The student is responsible for providing the required information outlined in sentence 2.

(8) ¹If the master's thesis is not complete and submitted completely in due time, it will be graded "failed" (5.0, "nicht ausreichend"). ²A master's thesis submitted in due time will be evaluated by the two examiners of the master's thesis. ³If the grades given by the two examiners differ, the grade awarded for the master's thesis must be the grade as defined in section 17 subsection 2 which comes closest to the arithmetic average of both individual grades. If in doubt, the better of the two grades is to be awarded. ⁴If the calculated average in line with sentence 3 is 4.1 or worse, the master's thesis is graded 5.0 ("nicht ausreichend").

(9) The topic of the master's thesis, the date on which the student was issued the topic, the end of the preparation period and the date on which the thesis is to be submitted are to be communicated to the Student Services and put into the records.

Section 17 – Grading of Examinations and Coursework, Calculation of Grades for Individual Examinations and Coursework and Module Grades

(1) ¹The grades for individual examinations and pieces of coursework are determined by the respective examiner; section 16 subsection 8(2) remains unaffected. ²The assessment is to be completed within four weeks; within two months for the master's thesis. ³If coursework or an examination is not completed in due time, it is considered "failed" or graded 5.0 ("nicht ausreichend").

(2) ¹The following grades may be assigned:

<i>Numerical Value</i>	<i>Grade</i>	<i>Explanation</i>
1.0 or 1.3	very good (“sehr gut”)	an excellent performance
1.7; 2.0 or 2.3	good (“gut”)	a performance which substantially exceeds the average requirements
2.7; 3.0 or 3.3	satisfactory (“befriedigend”)	a performance corresponding to the average requirements
3.7 or 4.0	fair (“ausreichend”)	a performance which, in spite of its flaws, suffices to meet the requirements
5.0	failed (“nicht ausreichend”)	a performance which does not meet the requirements due to considerable flaws

(3) If an examination comprises only one component, the overall examination grade equals the grade of the component. Section 16 subsection 8(2-4) remain unaffected.

(4) ¹If an examination comprises several components, the overall examination grade equals the grade closest to the weighted average grade calculated using the grades of the components. ²The weighted average grade is calculated to one decimal place; all further decimal places are excluded without rounding. ³The examination grades according to their weighted average are:

1.0 up to and including 1.1	= 1.0
above 1.1 and up to and including 1.5	= 1.3
above 1.5 and up to and including 1.8	= 1.7
above 1.8 and up to and including 2.1	= 2.0
above 2.1 and up to and including 2.5	= 2.3
above 2.5 and up to and including 2.8	= 2.7
above 2.8 and up to and including 3.1	= 3.0
above 3.1 and up to and including 3.5	= 3.3
above 3.5 and up to and including 3.8	= 3.7
above 3.8 and up to and including 4.0	= 4.0
4.1 or worse	= 5.0

⁴The weighting of individual examination and coursework components for the calculation of the respective grade are determined in the module catalog. Section 15 subsection 11(3) remains unaffected.

(5) The module grade equals the examination grade.

Section 18 – Passing Examinations and Modules, Obtaining ECTS Credits

(1) ¹An examination comprising only one component is passed if the grade 4.0, “fair”, or better is awarded. ²An examination comprising several components is passed if the examination grade calculated in line with section 17 subsection 4 equals 4.0, “fair”, or better. ³The examination process ends when the examination is passed.

(2) A module is passed if the respective module examination is passed.

(3) The module examination must be passed for ECTS credits to be awarded.

Section 19 – Failing and Redoing Coursework or Retaking Examinations (including Examinations and Preliminary Coursework), Failing the Final Examination Attempt

- (1) Failed pieces of coursework or examinations are those which have been graded “5.0” (“nicht ausreichend”) or which are considered “failed” (“nicht bestanden”) or graded “5.0” (“nicht ausreichend”).
- (2) ¹If an examination consists of one piece of coursework or one examination, it is considered “failed” (“nicht bestanden”) if said piece of coursework or examination has been failed. ²If an examination consists of several pieces of coursework or examinations, it is considered “failed” (“nicht bestanden”) if the grade calculated in line with section 17 subsection 4 is “5.0” “failed” (“nicht ausreichend”).
- (3) ¹Coursework or examinations which were done as required preliminary coursework for an examination and subsequently failed may be redone; it is not possible to redo the preliminary coursework in the same semester. ²If the student passes the preliminary coursework for an examination but fails the related examination in the same semester or if the attempt on the last possible examination date of the semester is deemed not taken, the required preliminary coursework usually must be redone and passed. ³The examiner of the retake examination decides on exceptions upon request of a student. ⁴In accordance with sentence 3, the request is to be submitted in due time and before the examination concerned takes place, otherwise the preliminary coursework is to be redone.
- (4) Failed examinations may generally be retaken once (resit examination).
- (5) When retaking an examination consisting of several components, all examination components are to be retaken.
- (6) ¹The failure of an examination is final if the resit examination was not passed. ²Failing the final attempt at an examination terminates the examination process.
- (7) It is not possible to retake an examination that has already been passed.

Section 20 – Breaches of Procedure

- (1) ¹The examination committee can remedy disturbances of the examination procedure or other breaches of procedure by virtue of office or upon request from a student by deciding on appropriate measures or orders. ²In particular, the examination committee may order that coursework or examinations must be retaken by all or by individual students or, in case the principle of equal opportunity was violated, grant an extension or impose another appropriate measure of compensation.
- (2) ¹Any disturbances are to be reported immediately by the affected student during a written or oral examination:
 1. in case of a written examination to the supervisor,
 2. in case of an oral examination to the examiner and
 3. in case of any other type of examination to the responsible examiner.

²Any other kinds of breaches of procedure are to be reported by the affected student in due time as soon as the student takes note of a particular breach of procedure. ³The reports according to sentences 1 and 2 must be entered into the examination minutes. ⁴If the disturbances of the examination procedure or any other kind of breaches of procedure relevant to the evaluation of the respective examination are not reported in due time, they are deemed insignificant.

- (3) ¹If the examination committee did not take measures of compensation in accordance with subsection 1 for a disturbance that occurred during an examination and was reported without delay or for other breaches of procedure, or those measures were inadequate, the student must address their request for the necessary measures of compensation to the examination committee in writing immediately after the examination. If the examination consisted of several parts, the request must be made immediately after the relevant part of the examination. ²The request is not to contain any conditions. ³If the disturbances of the examination procedure or any other kind of breaches of procedure relevant to the evaluation of the respective examination are not reported in due time, they are deemed insignificant.

Section 21 – Access to Examination Records

- (1) Provided that the examination papers have not been returned to the examined student, they are to be granted access to their written examinations once they are graded, including the Master’s Thesis, upon writ-

ten request submitted within an appropriate period of time. This includes the written examination, the respective evaluation(s) of the examiner(s) and the minutes of each examination.

(2) ¹The request has to be submitted to the chair or the Student Services within one year after having received the result of the respective examination. ²They decide on the time and place for accessing the examination records.

Part 2: Disadvantage Compensation

Section 22 – Extension of Examination Deadlines

(1) The examination and coursework deadlines as well as the deadlines to take examinations and complete coursework in order to complete the program are to be extended by the examination committee upon written request from a student, which is submitted in due time, if the respective student is in need of an extension due to special conditions they are not responsible for. The examination committee is to grant individual extensions based on case-by-case decisions.

(2) ¹In particular, this applies to students

1. with children, or
2. with a relative in need of care within the meaning of section 7 subsection 3 of the Caregiver Leave Act (PflegerZG), and for students
3. with a disability, or
4. with a chronic illness

if the situation resulting from the aforementioned special conditions requires an extension of the examination deadlines. ²The same applies to students who are eligible for periods of protection in accordance with section 3 subsections 1 and 2 of the maternity protection act (Mutterschutzgesetz, MuSchG).

(3) ¹A request in accordance with subsection 1 must be submitted immediately as soon as the student is aware of the circumstances demanding an extension of examination deadlines. ²If the request is not made in due time in accordance with sentence 1, the extension is only to be granted if additional requirements according to section 32 of the Administrative Procedure Act of Baden-Württemberg (LVwVfG) are met.

(4) ¹The student requesting the extension is responsible for producing adequate proof. ²If there are significant changes to the personal situation of the student, particularly any changes that would result in a lapse of entitlement to the extension, the student is obliged to inform the examination committee without delay.

(5) ¹The extension of deadlines to take examinations, resit examinations or complete coursework must not exceed a total of two semesters in any case. ²The extension of the deadline to complete the program must not exceed the standard period of study provided there are no legal regulations indicating otherwise.

(6) ¹The extension of examination deadlines, the preparation period and submission deadlines for coursework, particularly a term paper or master's thesis, are not covered by the subsections listed above. ²The option of requesting disadvantage compensation in accordance with section 23 remains unaffected.

(7) When calculating the examination deadlines, section 32 subsection 6 LHG must be taken into consideration.

Section 23 – Disadvantage Compensation

(1) ¹If students, as a result of a special condition or situation within the meaning of section 22 subsection 2, cannot take the respective examination or complete a piece of coursework, in particular due to the form of examination, they can request disadvantage compensation. Students are obliged to submit the request for disadvantage compensation in due time and in writing. In coordination with the respective examiners, the examination committee grants the appropriate disadvantage compensation in order to adhere to the principle of equal opportunities. ²Disabled students or students with a chronic illness are to submit their request for disadvantage compensation to the Commissioner and Counselor for disabled students and students with chronic illnesses. The examination committee is obliged to take the recommendation of the Commissioner and Counselor for disabled students and students with chronic illnesses into account in their decision making process.

(2) ¹A request as outlined in subsection 1 is to be made in due time before the coursework or examination concerned is started. Where it is the responsibility of the student to register for coursework or an examination, the request is to be submitted by the end of the registration period at the latest. ²If the request is not

made in due time in accordance with sentence 1, the extension is only to be granted if additional requirements according to section 32 of the Administrative Procedure Act of Baden-Württemberg (LVwVfG) are met. ³If students fail to submit the request for disadvantage compensation in due time in accordance with sentences 1 or 2, the special circumstances will not be considered for the evaluation of the respective coursework or examination. ⁴The possibility to withdraw or de-register from an examination or piece of coursework with a valid reason remains in effect.

(3) ¹It is the student's responsibility to provide sufficient proof of their special circumstances upon filing the request for disadvantage compensation. ²If there are significant changes to the special circumstances of the student before or during the claim for disadvantage compensation, particularly any changes that would result in a lapse of entitlement, the student is obliged to inform the examination committee without delay and in writing.

Section 24 – De-registration and Absence

(1) ¹If a valid reason, especially illness, prevents the student from entirely or partially taking an examination, they may request the approval of the reasons for de-registration or withdrawal. ²If an examination comprises several components, a request as outlined in sentence 1 can only be submitted for the examination as a whole. ³By way of derogation from sentence 2, a request according to sentence 1 may be submitted separately for the presentation part of the examination Team Project, if the written work was passed.

(2) ¹The request is to be submitted immediately without undue delay, in written form, to the Student Services office. The examination committee decides on the approval of the request. ²The student seeking approval is responsible for producing adequate proof. ³If the student is ill, they must submit a medical certificate to the Student Services. This certificate must include the medical diagnosis which confirms that the student is not able to take the examination. ⁴If the student has a child who is sick, or a relative who is in need of care, proof of this responsibility is to be submitted.

(3) The approval of the request is ruled out if the examination result has been published, unless valid proof could not be provided earlier by the student due to reasons beyond their control.

(4) In case the student is not able to take a mandatory examination for which they are registered due to a period of study at a university abroad, this, in particular, will be recognized as a valid reason.

(5) ¹If the student took an examination whilst being aware of an illness or on the basis of negligent lack of knowledge of an illness, a de-registration for this reason cannot be approved. ²In particular, the criteria for negligent lack of knowledge are met if the student did not react to symptoms of health problems as soon as possible.

(6) ¹If de-registration is approved, the examination is to be deemed not taken and it will be mandatory for the student to register for the next possible examination date. ²If a request in accordance with section 1 sentence 3 has been granted, the participant remains in the examination and is to continue with the examination at the next possible date.

(7) ¹If a request for de-registration is not approved, the request is to be deemed not made. ²In this case, the examiner grades an examination handed in by the student in due time; if the student did not hand in an examination in due time, the examination will be graded 5.0 (“nicht ausreichend”).

(8) ¹The student may de-register from required preliminary coursework, which is coursework that needs to be completed for admission to an examination, without providing proof of a valid reason. ²In such cases, admission to the examination must be ruled out for the semester in question, unless, upon request from the student, the examiner responsible allows the completion of different preliminary coursework as an alternative. ³The request is to be granted if, upon consideration, the significance of preliminary coursework is relative to the reasonable interests of the student. ⁴Section 23 remains unaffected.

Part 3: Master's Examination

Section 25 – Master's Examination

- (1) The master's examination is passed if all of the required examinations for the modules in the subject areas have been passed in due time.
- (2) ¹The master's examination comprises examinations from five subject areas which are composed of mandatory examinations amounting to 48 ECTS credits, mandatory elective examinations amounting to 18 ECTS credits and elective examinations amounting to at least 54 ECTS credits.

Section 26 – The Fundamentals Computer Science Subject Area

- (1) Three mandatory elective examinations, amounting to 18 ECTS credits, are to be passed.
- (2) ¹The student is responsible for selecting examinations. ²To choose, students must bindingly register for their first attempt at one of the mandatory elective examinations stated in the annex.
- (3) ¹If a student fails a final attempt of an elective examination with no option to resit, they can register for another available mandatory elective examination. ²Aside from the additional requirements, the student can only be admitted to take the alternative mandatory elective examination if they are still able to pass the required number of mandatory elective examinations in the area and, under normal circumstances, they can pass the examination within the maximum period of study. ³It is not possible to change the mandatory elective examination beforehand.
- (4) ¹If, by passing a mandatory elective examination, the student meets the number of credits required in this area, those mandatory elective examinations will be taken into account for this subject area which were completed first in chronological order. ²The additional elective examinations passed in the same semester are taken into account as elective examinations in the subject area Specialization Courses if the student has not yet met the number of credits required in this subject area, considering the elective examinations passed in the same semester in this subject area. ³In this case, again, the mandatory elective examinations which were completed first in chronological order will be taken into account. ⁴If the passed mandatory elective examinations exceed the number of credits to be obtained in the subject area Specialization Courses, these mandatory elective examinations are not taken into account for the successful completion of the master's examination, or the calculation of the subject area grade and the final grade. ⁵The mandatory elective examinations not to be taken into account according to sentences 1 to 4, including those in the area Specialization Courses, are to be listed in the Transcript of Records as additional examinations with the respective grade.
- (5) ¹If the subject area is passed, unfinished examination processes in this subject area are to be continued as elective examinations in the subject area Specialization Courses, if the number of credits required in the subject area Specialization Courses has not yet been met, taking into account subsection 4. ²If this is not the case, the examination processes is to end when the subject area is passed.
- (6) ¹The subject area is failed if the student has failed the final attempt at five of the seven available examinations. ²In this case, the examination committee notifies the student, in writing, that the respective elective mandatory examination has been failed and cannot be re-taken; the student loses their eligibility to take exams in accordance with section 32 subsection 5 (3.1) LHG.

Section 27 – The Fundamentals Business Administration Subject Area

- (1) Elective examinations amounting to 18 ECTS credits are to be passed in the Fundamentals Business Administration Subject Area.
- (2) ¹The student is responsible for selecting examinations. ²To choose, the student must bindingly register for the first attempt at an elective examination. ³The available modules, the corresponding examination as well as the required number of ECTS credits are listed in the annex in conjunction with the module catalog.
- (3) ¹If, by passing an elective examination in this subject area, the student meets or exceeds the 18 ECTS credits required in this subject area, the additional elective examinations passed in the same semester are not taken into account for the successful completion of the master's examination, or the calculation of the subject

area grade and the final grade. ²Whether additional elective examinations are taken into account depends on the chronological order of the examinations taken in the respective semester. ³The elective examinations not taken into account according to sentences 1 and 2 are to be listed on the Transcript of Records as additional examinations with the respective grade. ⁴If, after the end of the examination, during which the required examinations according to subsection 1 were passed, the student is involved in additional examination processes to which sentence 2 does not apply, these examination processes end.

(4) If the student fails their final attempt at an elective examination, the examination committee does not issue a notification; the student does not lose their eligibility to take exams in accordance with section 32 subsection 5 (3.1) LHG.

Section 28 – The Specialization Courses Subject Area

(1) Elective examinations amounting to 36 ECTS credits are to be passed in the Specialization Courses Subject Area.

(2) ¹The student is responsible for selecting examinations. ²To choose, the student must bindingly register for the first attempt at an elective examination. ³The available modules, the corresponding examination as well as the required number of ECTS credits are listed in the annex in conjunction with the module catalog. After passing the subject area Fundamentals Computer Science, the student may choose the mandatory elective examinations additionally listed in the Annex in this subject area, for which no examination process has been initiated yet, as elective examinations in the subject area Specialization Courses. To choose, the student must bindingly register for the first attempt at one of these examinations.

(4) If the student fails their final attempt at an elective examination, the examination committee does not issue a notification; the student does not lose their eligibility to take exams in accordance with section 32 subsection 5 (3.1) LHG.

Section 29 – The Projects and Seminars Subject Area

(1) Three mandatory examinations, amounting to 18 ECTS credits, are to be passed.

(2) ¹Different courses (seminars) are available as an examination in the module Seminar. ²The seminars available are listed in the module catalog. ³The student has two attempts at the examination in the module. ⁴The student is responsible for registering for each attempt at the examination with the examiner, taking into account the regulations as stated in section 11 subsection 6 no. 3. This also applies if an attempt has been deemed not taken. ⁵The student is responsible for choosing a seminar for each attempt. An additional attempt at the same seminar is not possible. ⁶To choose, students must bindingly register for an attempt with the examiner of the seminar. Once the seminar topic has been issued, registration is binding and the student is admitted.

(3) If the student fails their final attempt at one of the mandatory examinations, the examination committee notifies them, in writing, that the respective mandatory examination has been failed and cannot be re-taken; the student loses their eligibility to take exams in accordance with section 32 subsection 5 (3.1) LHG.

Section 30 – The Master's Thesis Subject Area

(1) The mandatory master's thesis, corresponding to 30 ECTS credits, must be successfully completed.

(2) The regulations stated in section 16 apply to the master's thesis in particular.

(3) If the student fails their final attempt at the master's thesis, the examination committee notifies the student, in writing, that the respective mandatory examination has been failed and cannot be re-taken; the student loses their eligibility to take exams in accordance with section 32 subsection 5 (3.1) LHG.

Section 31 – Calculation of the Area Grade, Grading of the Master's Examination (Final Grade)

(1) ¹The area grade is calculated using the grades achieved in the modules belonging to an area, weighted according to the number of ECTS credits allocated to the module; additional modules are not taken into con-

sideration when calculating subject area grades.²In the Master's Thesis subject area, the subject area grade equals the module grade.

(2) The overall grade of the master's examination is calculated from the average of the area grades weighted in ECTS credits.

(3) ¹For the subject area grades in line with subsection 1 sentence 1 as well as the final grade, only the first decimal place is of importance; all other decimal places are eliminated without rounding up or down. ²In line with sentence 1, the grades are as follows:

- in case of an average grade of 1.5 or better = "very good" ("sehr gut");
- in case of an average grade from 1.6 to 2.5 = "good" ("gut");
- in case of an average grade from 2.6 to 3.5 = "satisfactory" ("befriedigend");
- in case of an average grade from 3.6 to 4.0 = "fair" ("ausreichend").

(4) In case the final grade is 1.2 or better, the student graduates "with honors" ("mit Auszeichnung bestanden").

(5) ¹Prior to having received the final grade, students are given a preliminary average grade that is indicated on the Transcript of Records. ²The regulations on calculating and indicating the final grade are also applied to the preliminary average grade.

Section 32 – Failure of the Master's Examination; Confirmation

(1) ¹The master's examination is failed with no option to resit, if

1. a final attempt at an examination or piece of coursework, which these Examination Regulations and the respective attachment have highlighted as being required, has been failed, or
2. an examination deadline has been exceeded unless the student is not responsible for having exceeded this time limit.

If a mandatory examination according to sentence 1 no. 1 is failed with no option to resit, the examination committee notifies the student, in writing, in accordance with the regulations stated in the Annex.

(2) In case of failure of the master's examination and upon request by the student, the Student Services issue a confirmation listing all completed modules and the respective grades as well as all modules which have not been completed. The confirmation clearly states that the failure of the degree is final.

Section 33 – Master's Degree Certificate

(1) ¹After successful completion of the master's examination, the student is issued a degree certificate. ²This comprises:

1. the areas in section 3 subsection 1(1) numbers 1-4; areas are listed with the corresponding number of ECTS credits and the subject area grade (in words and figures);
2. the topic of the master's thesis and the name of the examiner;
3. the grade awarded for the master's thesis (in words and figures);
4. the final grade (in words and figures);
5. if applicable, the honors according to section 31 subsection 4.

³The certificate dates back to the day of completion of the last examination. ⁴If it is not possible to determine this date, the last day of classes of the respective semester serves as the date of completion. ⁵The certificate must be signed by the chair or deputy chair of the examination committee.

¹The degree certificate is to indicate if examinations corresponding to at least 60 ECTS credits were completed in English-taught modules. ²An examination is considered completed in English if the course was taught in English and the examination was completed in English.

(3) ¹An English Diploma Supplement in accordance with the European Diploma Supplement model is attached to each certificate. ²A Transcript of Records forms part of the Diploma Supplement comprising all completed modules and the respective examinations including the issued ECTS credits and grades. All completed additional modules and the respective examinations including the grades are listed as well.

(4) ¹The Diploma Supplement also contains an ECTS Grading Table in accordance with the ECTS guidelines. ²The ECTS Grading Table contains a list of the percentage as well as the numerical distribution of the final grades obtained by graduates of the master's program "Business Informatics" (M.Sc.). ³The ECTS Grading Table is produced annually in June. ⁴The calculation is based on the final grades of all graduates who have completed their program of study in the last three years. ⁵The examination committee may decide to extend the period taken into account for the calculation.

Section 34 – Diploma

¹Along with the master's degree certificate, the student receives a diploma certifying the conferment of the academic degree and comprising the final grade of the degree and/or the honors ("mit Auszeichnung bestanden") according to section 31 subsection 4. ²The diploma bears the date of the master's degree certificate. ³The diploma is signed by the dean of the school or their deputy and bears the seal of the university.

Part 4: Violation of the Examination Regulations

Section 35 – Cheating and other Misconduct

(1) ¹If a student manipulates or tries to manipulate their examination by cheating or using unauthorized resources or by influencing the examiner or supervisor in favor of themselves or a third person, the respective examination or further examinations may be graded "failed" or the student may be excluded from the examination depending on the severity of the violation. ²In especially severe cases, the student can be excluded without the option to retake the examination. ³It is also considered cheating according to sentence 1 if coursework or examinations contain quotations or references from the works of others which have not been indicated as such by the student.

(2) ¹If a student tries to have coursework and/or examinations completed abroad recognized on the basis of false information, the coursework or examinations they are to substitute are graded "failed". ²In case of mandatory courses, the coursework or examinations to be substituted must be submitted or taken on the next possible date at the University of Mannheim.

(3) ¹A student who violates the examination regulations severely, in particular, if they disturb the proper course of an examination, may be excluded from the examination by the examiner or the supervisor. ²In such cases, the relevant coursework or examination is graded "failed". ³In severe cases, the examination committee may exclude the student from taking any further examinations.

Section 36 – Voidness of the Master's Examination

(1) ¹In case a student has manipulated an examination by cheating and this fact is revealed after the student has received the master's degree certificate, the examination committee can revise the result or the respective grade retroactively and declare the examination as completely or partially failed. ²If the completion of the master's examination is affected by this, the examination committee can revoke the respective ECTS credits and, if necessary, declare the master's examination "failed with no option to resit".

(2) ¹If the requirements to be admitted to an examination were not met, without the candidate's intent to disguise this fact and if this fact is revealed after the student has received the master's degree certificate, this defect is remedied by having passed the examination. ²If the student attained admission illegitimately on purpose, the examination and consequently the degree completion may be considered "failed" ("nicht bestanden").

(3) The person in question must be granted the chance to comment on the issue prior to the decision.

(4) ¹Inaccurate master's degree certificates are to be recalled. ²Where applicable, new master's degree certificates are to be issued. ³Along with the inaccurate master's degree certificates, the respective diploma is to be recalled if changes to the final grade have to be made or failure of degree completion was declared. ⁴After a period of time of five years starting from the issuance date of the original master's degree certificate, a decision in accordance with subsection 1 or subsection 2 sentence 2 is no longer possible.

(5) The revocation of the degree complies with the legal rules and regulations.

IV. Final Provisions

Section 37 – Commencement; Scope; Transitional Provisions

(1) ¹These Examination Regulations become effective on 1 February 2018. ²The Examination Regulations only apply to students who start their master's program "Business Informatics" (M.Sc.) at the University of Mannheim in the first or advanced semester in the spring semester 2018 or later.

(2) ¹The examination regulations of the University of Mannheim for the master's program "Business Informatics" of 7 March 2013 (Bulletin of the President's Office (Bekanntmachungen des Rektorats) No. 07/2013 Part 4 pp. 117 et seqq.) in their current version ceases to be effective with the commencement of these examination regulations. ²Students who have already started their master's program "Business Informatics" (M.Sc.) at the School of Business Informatics and Mathematics at the University of Mannheim under the examination regulations that cease to be effective in accordance with sentence 1, have the option to finish their program according to the former examination regulations up until and including the fall semester 2021/2022. ³The fall semester 2021/2022 will be the last semester to offer examinations according to the former examination regulations that ceased to be effective in accordance with sentence 1. ⁴Students who do not manage to complete their program until then are to be disenrolled; further disenrollment reasons, especially section 62 subsection 3 sentence 1 number 2 LHG, remain unaffected.

(3) ¹By way of derogation from section 5 subsection 2(3), the term of office for the first members of the examination committee, who are to be appointed once these Examination Regulations have become effective, starts on the day of their appointment; the term of office for the non-student members ends on 31 July 2019, for the student members on 31 July 2018. ²The examination committee for the program "Business Informatics" at the School of Business Informatics and Mathematics at the University of Mannheim in accordance with its examination regulations as at 7 March 2013 in the respective valid version conducts the affairs of the examination committee for this program temporarily until members are appointed.

Article 2 of the first amendment as at 7 June 2018:

This amendment applies to all students of the master's program "Business Informatics" (M.Sc.) of the School of Business Informatics and Mathematics and the Business School at the University of Mannheim who are studying in the aforementioned program according to the Examination Regulations for the master's program "Business Informatics" (M.Sc.) of the School of Business Informatics and Mathematics and the Business School dated 12 December 2017 (Bulletin of the President's Office (Amtliche Bekanntmachungen des Rektorats) No. 33/2017, p. 5 et seqq.) in the respective valid version.

Article 3 section 2 of the second amendment as at 18 December 2023:

Section 1 applies to all students who study the master's program "Business Informatics" in accordance with the examination regulations for the master's program "Business Informatics" (M.Sc.) of the School of Business Informatics and Mathematics and the Business School of 12 December 2017 (Bulletin of the President's Office (Bekanntmachungen des Rektorats) No 33/2017 pp. 5 et seqq.) in its respective valid version.

Annex: Subject Area Components

List of Abbreviations

P	mandatory examination (Pflichtprüfung)
WP	mandatory elective examination (Wahlpflichtprüfung)
W	elective examination (Wahlprüfung)

1. Fundamentals Computer Science (18 ECTS credits)

	Module Name		Coursework (Composition and Type)	ECTS Credits
WP	CS 500	Advanced Software Engineering	One piece of coursework (written): Exam (90 min.)	6
WP	CS 530	Database Systems II	One piece of coursework (written): Exam (90 min.)	6
WP	CS 550	Algorithmics	One piece of coursework (written): Exam (90 min.)	6
WP	CS 560	Large Scale Data Management	One piece of coursework (written): Exam (90 min.)	6
WP	IE 500	Data Mining I	Three pieces of coursework (two written, one oral): exam (60 min.), project report and presentation	6
WP	IE 560	Decision Support	Two pieces of coursework (written): exams (45 min. each)	6
WP	IS 553	System Software	MMM*	6

* The coursework which belongs to this module is stipulated in the examination regulations for the master's program "Mannheim Master in Management" (M.Sc.) at the University of Mannheim in combination with the current version of the module catalog for this program.

2. Fundamentals Business Administration (at least 18 ECTS credits)

¹For the subject area Fundamentals Business Administration, level 500 and 600 modules from the following Areas of the Business Administration program must be selected:

1. Accounting and Taxation (ACC, TAX);
2. Banking, Finance and Insurance (FIN);
3. Management (MAN);
4. Marketing (MKT);
5. Operations Management (OPM).

²The available modules, the respective type of coursework and the required number of ECTS credits are listed in the module catalog. Section 3 subsection 2(5) remains unaffected.

³Level 500 modules require basic academic knowledge of business administration. ⁴Level 600 modules may require the passing of certain level 500 modules due to their advanced level, as indicated in the module catalog of the master's program "Mannheim Master in Management" (M.Sc.).

3. Specialization Courses (36 ECTS credits)

¹For specialization in the subject area Specialization Courses, elective modules amounting to 36 ECTS credits must be taken. ²The available modules, the respective type of coursework and the required number of ECTS credits are listed in the module catalog. Section 3 subsection 2(5) remains unaffected. ³All modules listed in the module catalog under “Specialization Courses” may be selected. ⁴Further, all modules from the subject area Fundamentals Computer Science may be selected for the subject area Specialization Courses, if the former has been passed and no examination process for the mandatory elective examinations in these modules has been initiated yet.

4. Projects and Seminars (18 ECTS credits),

	Module Name		Coursework (Composition and Type)	ECTS Credits
P	TP 500	Team Project	Two pieces of coursework (one written, one oral): Essay and presentation	12
P	SQ 500	Scientific Research	One piece of coursework (written): Exam (150 min.)	2
P	CS 7xx and IS 7xx	Seminar	One piece of coursework (written): Term paper or Two pieces of coursework (one written, one oral): term paper and presentation or Three pieces of coursework (one written, two oral): term paper and two presentations	4

5. Master’s Thesis (30 ECTS credits)

	Module Name	Coursework (Composition and Type)	ECTS Credits
P	Master’s Thesis	One piece of coursework (written): Master’s Thesis	30
